# Professional Cloud Developer [More Information](#)

Google Cloud  [More Credentials](#)

## ISSUED ON

July 8, 2019

## EXPIRES ON

 July 8, 2021

A Professional Cloud Developer builds scalable and highly available applications using Google recommended practices and tools that leverage fully managed services. This individual has experience with next generation databases, runtime environments and developer tools. The Professional Cloud Developer also has proficiency with at least one general purpose programming language and is skilled with using Stackdriver to produce meaningful metrics and logs to debug and trace code.

The Professional Cloud Developer exam assesses your ability to:

- Design highly scalable, available, and reliable cloud-native applications
- Build and test applications
- Deploy applications
- Integrate Google Cloud Platform services
- Manage application performance monitoring
